

50mm Water Oscillating Monitor

Description

The SA50 water oscillating monitor is constructed from stainless steel with stainless steel swivel units. The monitor is based on the standard Sentinel monitor which has been proven over decades to be durable in the harshest conditions.

The operating pressure range for the SA50 WOM is 500 kPa to 1200 kPa. Maximum recommended flow is 1500 lpm.

The SA50 has an adjustable water oscillating sweep of 30 degrees to 120 degrees. The unit is fitted with a manual override and a sweep speed control.

The water oscillating unit uses a maximum of 35 litres per minute at maximum sweep speed (8 degrees per second). The elevation adjustment range is -45 degrees to +75 degrees.

The separate oscillator unit allows full independent monitor movement (360°).

Ideal for washdown, the unit is designed for high usage rates.

Dimensions

Height:	630mm (excluding handle)
Width:	430mm
Depth:	410mm
Nozzle Height:	430mm
Weight:	20 kg

Performance Data

Friction Loss Curves

Operating Pressures:	500 kPa - 1,500 kPa
Pressure Test Pressure:	2,500 kPa
Flow Range:	up to 1,500 lpm
Elevation Adjustment:	-45° to +75°
Horizontal Sweep:	Adjustable from 30° to 120°
Oscillating Speed:	Adjustable
Oscillating Unit Water Consumption:	35 litres per minute (Max.)
Inlet Flange:	50mm Table E
Outlet Connection:	40mm BSP Male or 50mm BSP Male

Options

- A range of inlet flange connections.
