

## Foam Rim Seal Pourers FR-Series

---

### Description

The ORION Model FR-series Foam Pourers are designed to work with our FFM-40 and FFM-50 foam makers for the protection of floating roof storage tanks. The pourer bolts directly to the rim of the tank and has been designed to apply the foam as gently as possible to the tank wall. Clamps are available for fitting the FR-series Foam Pourers to tanks without hot work.

The FR-series is made from steel and galvanised after fabrication. A stainless steel mesh is fitted to the outlet to prevent nesting of birds or entry of foreign objects. The outlet is fitted with vertical reinforcements and carefully angled lip to prevent seal damage in the event of an accidental overflow of the product tank.

## Specifications

Inlet	Model FR-40 40mm NPT	Model FR-50 50mm NPT
Foam Maker	FFM-40	FFM-50

The flow rates available for the FR-series correspond to those available for the FFM-40 and the FFM-50 foam makers. This gives the FR-series in combination with these foam makers a range of flows from 30 litres per minute up to 800 litres per minute. The operating pressure range for the FFM model foam makers is 200 kPa to 1000 kPa. Installation details (FR-40).
