

Foam Concentrate Supply

With over 30 years in the fire fighting industry, Orion have acquired a great depth of knowledge of foam concentrates, their flow and their performance characteristics. This is complimented by our equally in depth experience with designing equipment and systems.

We can supply a comprehensive range of C6 compliant foam concentrates, including:

- AFFF – 1%, 3% and 6%
- ARAFF – 3/3 and 3/6
- ARAFF (low viscosity) – 1/1, 1/3 and 3/3

Products may comply with a number of recognised standards, some are UL listed, ICAO B, Lastfire etc.

Orion can also supply the latest in Fluorine Free technology, with a 3/6 AR product which has ICAO B certification.

Foam Concentrate Regulations

Changes in regulations mean that fire fighting foams containing levels of PFOS or PFOA above a certain threshold can cause environmental and health concerns and may not be used.

Orion's range of foam concentrates are fully compliant with all existing standards. If you want to check whether your foam is compliant with the latest regulations then contact us for assistance.

Foam Concentrate Testing

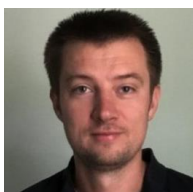

The foam in your fire fighting system should be tested annually. Orion have the equipment and knowledge to carry out all of your foam concentrate testing. These tests include:

- Proportioning Rate testing
- Expansion Ratio
- Drainage Time
- pH
- Density
- Laboratory fire test
- PFOS and PFOA Testing

Foam Concentrate Disposal

Do you have some old Foam Concentrate that you need to dispose of? Speak to us today to find out how we can help you.
